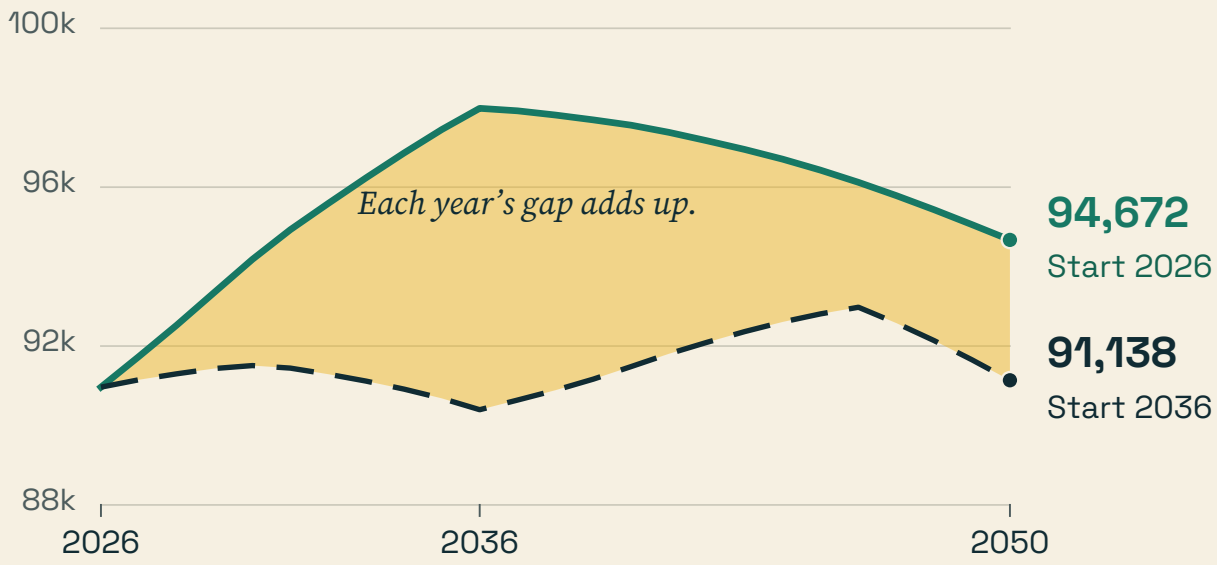
The years before 2050 COUNT TOO.

Same assumed changes. Two different starting years.

MODELLED EMPLOYED PEOPLE

CONDITIONAL PATHS



ABOUT

106,000

additional employed-person-years by 2050

Starting in 2026 rather than 2036.

The sum of annual differences in 2027–2050; not distinct workers.

Source: Michel, Population Future (3 Nov 2026), p. 11; executed timing paths.

Fertility toward 1.8 births/woman over 15 years; extra annual net migration +2 per 1,000 phased over 5; employment +5 percentage points at ages 25–64 over 10. Assumed changes; older-work effect excluded.
